Subject: **Stonebridge at Potomac Town Center Completion**  
Potomac Town Center Buildings 2-7 – 2011069

Dear Mr. Cuviello:

This letter is written to express our appreciation for the effort shown to complete the Floor Grinding and Polishing work at the Potomac Town Center Project in Woodbridge Virginia. It took a persistent and determined effort to bring this project to a successful conclusion. This project was completed with a high safety standard, high quality, on time and within the owners budget. It could not have been accomplished without the persistent and determined effort of everyone involved including Cuviello Concrete & Terrazzo Polishing.

We especially appreciate the way that Cuviello Concrete & Terrazzo Polishing overcame the challenge working with a new flooring product under extreme time pressure. Brian Gallagher and Kyle Williams were instrumental in the field keeping things moving thru multiple shifts to meet the time deadlines and owners expectations without the loss of quality.

This project is one to be proud of and it will be a fixture in the Woodbridge community for many years for everyone to enjoy. Thanks again for your perseverance and best wishes to you in your future endeavors!

Sincerely,

HENSEL PHELPS CONSTRUCTION CO.

Tim Berryman  
Project Manager
